

About Dr. Tel-Oren

Dr. Adiel Tel-Oren ("Dr. T") is an MD trained in Europe and the USA (licensed in Europe), a Doctor of Chiropractic (trained in the USA), and a Licensed Nutritionist (Minnesota). He is board-certified in Functional Medicine, Clinical Nutrition, Disability Analysis, and Oxidative Medicine/Chelation Therapy. He is a Professor & Certified Clinical Nutritionist with the International and American Association of Clinical Nutritionists. Dr. Tel-Oren is President Emeritus of the University of Natural Medicine (Santa Fe, New Mexico), where he is Dean of Medical Sciences and Professor of Functional and Nutritional Medicine. He lectures internationally to doctors, health practitioners, and the public, and trains doctors in "Natural Functional Medicine" & in applying his skin treatment methods.

Dr. Tel-Oren approaches most health challenges utilizing functional, dietary, clinical, and nutritional medicine, plus special therapeutic modalities and in-depth detoxification protocols. He also offers skin-lesion clinics in over 30 U.S. cities and 25 Israeli locations (www.doctorTevents.com). He lectures about 250 times per year on 150 health topics, conducts clinical research, authors books & articles, offers certification seminars, and does radio/TV interviews. He also guides groups on Humanitarian Eco-Treks in Nepal & Tropical Thai Retreats, and leads foraging trips in Wisconsin, where he builds Habitat 4 Humanimals™ - an earth-sheltered Eco-Village & Healing Sanctuary. His eco-products include Bio-Active Plant Fraction® (BPF) Formulas, Himalayan Sulfur-Rich Black Salt (a factory he built in Nepal to support his Nepali Schools), The Green Bakery® - the 1st organic gluten-free hypoallergenic breads, and The Ecopolitan® in Minneapolis - the healthiest ecological restaurant, culinary classes, a clinic, and the Eco-Stay Health Retreat (www.ecopolitan.com).

Dr. T is Founder & Director of several non-profit organizations in the USA, Israel and Nepal. In the USA: 1. Ecopolitan Eco-Health Community. 2. Bio-Mental Health Foundation. 3. Functional & Dental Health Foundation. In Israel: the Israeli Center For Functional Medicine. In Nepal: Everest Learning Academy (ELA) - a network of schools, community outreaches, orphanages, and child care centers that educate, nurture, and protect thousands of disadvantaged children and orphans in remote Nepali villages from child trafficking, prostitution, and slavery. For contributions, volunteering, or to join an Eco-Trek & Thai Retreat - see www.Nepali-Children.org

The Ecopolitan Eco-Health Community (EEC) is Dedicated to sustainable global care, by improving basic conditions for distressed communities and children in need worldwide: Increasing literacy and technical skills; providing holistic education and protection to the most vulnerable members of society; enhancing hygiene & health awareness; building community-supportive infrastructure; and creating economic opportunities. EEC and its main project - Nepal's ELA - are funded by Dr. T's skin lesion clinics (via his trained licensed doctors), nutritional consultations, lectures, Eco-Treks, products, and fundraising by Ecopolitan Coordinators around the USA. You can become a vital part of the EEC by harnessing your wisdom, passion and enthusiasm to organize or attend events & lectures in your area, or by volunteering or contributing in the name of global health, peace, and abundance!

What Skin Lesions Can Be Easily Removed?

ANY IRREGULAR SKIN AREAS – roughness, growths and blemishes, including, but not limited to: **BIRTHMARKS** - blemishes that exist from birth (“congenital”) - *cancer may start within them!* **CONDYLOMAS** – genital or anal warts. **KERATOSES** – protruding or rough, hard or scaly patches, often pre-cancer (diet, genetics, and exposure related). **MOLES/NEVI** - pigmented or non-pigmented protrusions or “beauty marks” (tumors caused by neurological pathology, diet, solar exposure, and/or genetic influences). **SENILE HEMANGIOMAS** - small to large red “blood blisters” (usually from diet-related capillary damage). **SKIN TAGS** - many pigmented or non-pigmented thin-based protrusions (usually from hormonal imbalance). **“SUN SPOTS”** – pigmented or rough areas on face, scalp, & hands. **XANTHOMAS** - fatty white dots/areas near eyes.

Why Remove Them?

1. APPEARANCE – Excellent results on the face. No scarring, pitting, or regrowth in the vast majority. Superior results with pre-cancer, flat or deep-pigmented lesions - minimal scarring. **2. SAFETY** - Reduced risk & *prevention of skin cancer* - no more guessing or monitoring for dangerous changes that justify risky, invasive, scarring procedures that can stimulate/spread cancer. **3. WELLNESS** – Elimination of pathology and reduced neurological irritation to the brain/spinal cord from asymmetrical skin growths. Smoothness = Health. **4. COMFORT** - no more irritation, friction or bleeding from close insect bites, clothing, jewelry, shaving, or hair combing. **5. CONVENIENCE** - Usually requires only one treatment. NO painful cutting, stitching, burning or freezing, with risk of infection, scarring or recurrence. **6. GUARANTEE** - in rare cases of incomplete results, there is no charge for re-treatment.

How Are They Removed?

Dr. Tel-Oren’s safe, effective, proprietary acidic liquid compound is gently applied onto the lesion. The liquid instantly constricts the lesion’s capillaries, turning it white & restricting its nutrient supply. A scab forms in a few days & drops off in a few weeks, leaving esthetically pleasing skin. The best results are achieved with any size growths on the face. Mild depigmentation may occasionally occur on the arms, legs, & torso, especially when melanin-containing or cancer-prone flat areas are treated. Once a deeper layer of pigment has been exposed, it can be safely retreated until the removal is complete.

How to Prepare for Treatment

- 1. Immediately Upon Arrival:** Remove make-up, lotions, creams, oils, etc. that cover your skin lesions. Prepare to be seen by the doctor.
- 2. Read this Skin Growth & Blemish Removal Brochure:** The information here is very important for you to know. (*You may be tested!*)
- 3. Complete the Intake Form:** Clearly fill in all information, including your email address. *Sign it, and hand it to the doctor.*
- 4. Budget: It is helpful to determine ahead of time** the upper limit of spending for your visit. The doctor can then work within your budget so that the most important areas are addressed first.

Following the Treatment

- 1. First 12 hrs. (minimum) to 24 hrs. (best) Keep the treated areas dry** - no shower, creams, oils, or lotions. During the first 2-3 hours, the treated area will shrink and become pale with a red halo - blood vessels have constricted, causing the malnourished cells to die.
- 2. After 12-24 hours and until the scab falls off:** You can shower or rinse *briefly* as *the scab must not absorb water* - NO prolonged sink, bath, or water immersion and NO oil, cream or lotions touching the scab. For best results, nearby makeup must be removed quickly, minimizing water-scab contact. **Dry powder** can be used to conceal the scab but it must stay on the scab without washing or cleaning *until the scab falls off.*
- 3. After 3-5 days:** a hard scab will form on the treated area. *Do not rub, scratch, or pick it* (after showering, gently pat it dry). If you pull off the scab before it is ready, a new scab will form, but healing will be delayed (with minimal scarring). If it itches, apply a cold pack or ice inside a plastic bag - or slap on it with your hand. Continue to keep it dry!
- 4. After 12-17 days:** the scab will fall off naturally, leaving smooth new skin (flat pigmented/deeper lesions, pre-cancerous keratosis, & lesions on the limbs will often take longer to fall off and may discolor or minimally scar). Any redness or discoloration will improve over time – be patient, as it may take months in some cases.

Cost of Service

The first typical lesion is \$100-\$150 (based on size and location); three average lesions are \$200-\$250; six average lesions are \$300-\$350; ten average lesions are \$400-\$450. Additional lesions are \$15-\$45 each. The greater the number removed, the lower the fee per lesion.

Skin Clinic proceeds and donations will nurture, educate, and protect thousands of disadvantaged Nepali children from child trafficking, slavery, and prostitution. www.Nepali-Children.org
